

Contents

Preface *xix*

CHAPTER 1

Anatomy, Neuroanatomy, and Physiology of the Speech Mechanism 1

Respiration: Structures and Processes 1

Respiration Patterns During Speech Production 1

Framework of Respiration 2

Muscles of Respiration 4

Phonation: Structures and Processes 7

Larynx 7

Laryngeal Structures and Cartilages 7

Intrinsic Laryngeal Muscles 8

Extrinsic Laryngeal Muscles 9

Vocal Folds 11

Physiology of Phonation 11

Neuroanatomy of the Vocal Mechanism 13

Resonation and Articulation: Structures and Processes 14

Fundamentals of Resonation 14

Fundamentals of Articulation 15

Neuroanatomy and Neurophysiology: The Nervous System 25

Neurons and Neural Transmission 26

Anatomy and Physiology of Nerve Cells 26

Neural Transmission 26

The Peripheral and Autonomic Nervous Systems 28

Peripheral Nervous System 28

Autonomic Nervous System 35

The Central Nervous System 37

Basic Principles 37

The Brainstem 38

Reticular Activating System 40

Diencephalon 40

Basal Ganglia 40

The Cerebellum 41

The Cerebrum 42

Pyramidal System 46

Extrapyramidal System 48

Connecting Fibers in the Brain 50

The Cerebral Ventricles 51

Protective Layers of the Brain 51

Cerebral Blood Supply 52

Chapter Highlights 55

Study and Review Questions	56
References and Recommended Readings	58
Study and Review Answers	59

CHAPTER 2

Physiological and Acoustic Phonetics: A Speech Science Foundation 61

Basic Principles and Definitions	61
Definitions	61
Anatomy and Physiology: A Brief Review	62
Phonetic Transcription	63
The International Phonetic Alphabet	63
Broad Phonetic Transcription	64
Narrow Phonetic Transcription	65
Production of Segmentals: Consonants and Vowels	65
Consonants and Vowels: The Syllable as a Unit	66
Classification Systems	67
Consonants	68
Vowels	73
The Effects of Context on Speech Sound Production	76
Dynamics of Speech Production	76
Suprasegmentals	77
Speech Science: Physiological Phonetics, Acoustic Phonetics, and Speech Perception	78
Introduction to the Study of Sound and Acoustic Analysis of Speech	80
Sound Wave Generation and Propagation	80
Frequency and Pitch	81
Amplitude and Loudness	81
Sound Pressure Level and Hearing Level	82
Introduction to the Acoustic Analysis of Speech	82
Chapter Highlights	84
Study and Review Questions	85
References and Recommended Readings	87
Study and Review Answers	88

CHAPTER 3

Language Development in Children 91

Terms and Definitions	91
Morphology	91
Syntax	92
Semantics	94
Pragmatics	95

Typical Language Development: Developmental Milestones 96

- Role of the Caregiver in Language Development 96
- Birth–1 Year 97
- 1–2 Years 99
- 2–3 Years 102
- 3–4 Years 103
- 4–5 Years 106
- 5–6 Years 108
- 6–7 Years 109
- 7–8 Years 110
- Development of Literacy Milestones 111
- Language Development and Education in the School-Age Years 112

Theories of Language Development 113

- Behavioral Theory 113
- Nativist Theory 115
- Cognitive Theory 116
- Information-Processing Theory 119
- Social Interactionism Theory 120

Chapter Highlights 121

Study and Review Questions 122

References and Recommended Readings 128

Study and Review Answers 130

CHAPTER 4

Language Disorders in Children 133

Introduction to Children With Language Disorders 133

- Description of Language Disorders in Children 134
- Risk Factors for Language Disorders in Children 134

Children With Specific Language Impairment 135

- Characteristics of Children With Specific Language Impairment 135

Children With Language Problems Associated With Physical and Sensory Disabilities 139

- Intellectual Disability 139
- Autism Spectrum Disorders 140
- Brain Injury 142

Children With Language Problems Related to Physical and Social–Environmental Factors 145

- Language Problems Related to Poverty 145
- Language Problems Related to Neglect and Abuse 146
- Language Problems Related to Parental Drug and Alcohol Abuse 147
- Language Problems Related to Attention-Deficit/Hyperactivity Disorder 149

Assessment Principles and Procedures 151

- Language Assessment: General Principles and Procedures 151
- Assessment of Infants and Toddlers 154

Assessment of Preschool and Elementary-Age Children	157
Assessment of Adolescents	160

Treatment Principles and Procedures 164

General Principles	164
Specific Techniques	165
Augmentative and Alternative Communication	171

Chapter Highlights 174

Study and Review Questions 175

References and Recommended Readings 179

Study and Review Answers 184

CHAPTER 5

Speech Sound Development and Disorders 187

Foundations of Articulation and Phonology 187

Basic Definitions	188
Distinctive Features Paradigm	188
Place-Voice-Manner Paradigm	189

Acquisition of Articulatory and Phonological Skills: Typical Development 191

Theories of Development	191
Infant Development: Perception and Production	193
Typical Articulation Development in Children	194
Overall Intelligibility	194
Typical Phonological Development in Children	196

Speech Sound Disorders 198

General Factors Related to Speech Sound Disorders	198
Description of Articulatory Errors	199
Organically Based Disorders	200

Assessment of Speech Sound Disorders 204

Screening	205
General Assessment Objectives	205
Related Assessment Objectives	205
Assessment Procedures	205
Specific Components of an Assessment	207
Scoring and Analysis of Assessment Data	208

Treatment of Speech Sound Disorders 210

General Considerations in Treatment	211
Motor-Based Approaches	212
Linguistic Approaches	214
Core Vocabulary (Consistency) Approach	216
Phonological Awareness Treatment	216

Adults Who Speak English as a Foreign Language 218

Principles of Assessment	218
Principles of Accent Training	219

Chapter Highlights	220
Study and Review Questions	221
References and Recommended Readings	225
Study and Review Answers	228

CHAPTER 6

Fluency and Its Disorders 231

Fluency and Stuttering: An Overview	231
Definition and Description of Fluency	231
Definition and Description of Stuttering	232
Forms of Dysfluencies	234
Theoretical and Clinical Significance of Dysfluencies	235
Incidence and Prevalence of Stuttering	235
Onset and Development of Stuttering	239
Associated Motor Behaviors	239
Associated Breathing Abnormalities	240
Negative Emotions and Avoidance Behaviors	240
The Loci of Stuttering	241
Stimulus Control in Stuttering	242
People Who Stutter and Their Families	244
Theories of Stuttering	245
Assessment and Treatment of Stuttering	249
Assessment of Stuttering	249
Treatment of Stuttering	252
Neurogenic Stuttering	258
Definition and Etiology of Neurogenic Stuttering	258
Description of Neurogenic Stuttering	259
Assessment and Treatment of Neurogenic Stuttering	259
Cluttering	260
Definition and Description of Cluttering	260
Assessment and Treatment of Cluttering	261
Chapter Highlights	262
Study and Review Questions	263
References and Recommended Readings	266
Study and Review Answers	269

CHAPTER 7

Voice and Its Disorders 271

Vocal Anatomy and Physiology	271
The Larynx	271
Voice Changes Through the Life Span	275

Vocal Pitch, Volume, and Quality 277

Pitch 277

Volume 277

Quality 277

Evaluation of Voice Disorders 279

Case History: Purposes and Goals 279

A Team-Oriented Approach 280

Instrumental Evaluation 280

Perceptual Evaluation 284

Disorders of Resonance and Their Treatment 287

Hypernasality 287

Hyponasality 288

Assimilative Nasality 288

Cul-de-Sac Resonance 289

Treatment Principles 289

Disorders of Phonation and Their Treatment 290

Carcinoma and Laryngectomy 290

Physically and Neurologically Based Disorders of Phonation 294

Abuse-Based Disorders of Phonation 302

Disorders of Loudness and Pitch 307

Psychogenic Voice Disorders 308

Gender Issues and the Voice 309

Chapter Highlights 311

Study and Review Questions 312

References and Recommended Readings 316

Study and Review Answers 318

CHAPTER 8

Neurologically Based Communicative Disorders and Dysphagia 321

Aphasia 321

Foundational Concepts 322

Definition and Classification of Aphasia 323

Nonfluent Aphasias 323

Fluent Aphasias 325

Subcortical Aphasia 328

Aphasia in Bilingual Populations 329

Assessment of Aphasia 329

Treatment of Aphasia 334

Alexia and Agraphia 338

Agnosia 338

Apraxia of Speech 339

Definition and Distinctions 339

Neuropathology of AOS	339
General Symptoms of AOS	340
Communication Deficits in AOS	340
Assessment of AOS	341
Treatment of AOS	342

The Dysarthrias 343

Definition of the Dysarthrias	343
Neuropathology of the Dysarthrias	343
Communicative Disorders Associated With Dysarthria	344
Types of Dysarthria	344
Assessment of the Dysarthrias	348
Treatment of the Dysarthrias	350

Dementia 351

Definition and Classification of Dementia	351
Dementia of the Alzheimer Type (DAT)	352
Frontotemporal Dementia (Including Pick's Disease) and Primary Progressive Aphasia	353
Dementia Associated With Parkinson's Disease	356
Dementia Associated With Huntington's Disease	357
Infectious Dementia	357
Other Forms of Dementia	358
Assessment of Dementia	358
Clinical Management of Dementia	359

Right-Hemisphere Brain Damage 361

Foundational Concepts	361
Symptoms of Right-Hemisphere Brain Damage	362
Assessment of Right-Hemisphere Brain Damage	363
Communication Treatment of Patients With Right-Hemisphere Brain Damage	364

Traumatic Brain Injury 365

Definition and Incidence of TBI	365
Common Causes of TBI	366
Types and Consequences of TBI	366
General Assessment of Patients With TBI	367
Assessment of Communicative Deficits Associated With TBI	367
Treatment of Patients With TBI	368

Swallowing Disorders 370

Nature and Etiology of Swallowing Disorders	370
Normal and Disordered Swallow	370
Assessment of Swallowing Disorders	372
Treatment of Swallowing Disorders	373

Chapter Highlights 377

Study and Review Questions 378

References and Recommended Readings 382

Study and Review Answers 389

CHAPTER 9

Communication Disorders in Multicultural Populations 391

Foundational Issues 391

- Demographic Data 391
- General Cultural Considerations 392
- ASHA Guidelines Regarding Multicultural Issues 393

Speech–Language Characteristics of CLD Clients 394

- Dialects of American English 394
- African American English 395
- Characteristics of AAE Morphology, Syntax, and Articulation 396
- Spanish-Influenced English 396
- English Influenced by Asian Languages 402

Language Differences and Language Impairment 403

- Differentiating Language Differences From Language Impairments 404
- Acquiring a Second Language 406
- Conversational Informal Language Fluency and Formal Academic Language Fluency 408

Assessment of CLD Clients 410

- Legal Considerations 410
- Considerations in the Use of Standardized Tests 411
- Alternatives to Standardized Tests 413
- Working With Interpreters in the Assessment Process 416

Treatment Considerations in Service Delivery to CLD Clients 417

- Children With Language Impairments 417
- Prevalence and Incidence Rates of Medical Conditions and Communication Disorders 418
- Potential Sociocultural and Linguistic Barriers to Service Delivery 419
- Adults With Neurologically Based Disorders of Communication 420

Chapter Highlights 422

Study and Review Questions 423

References and Recommended Readings 428

Study and Review Answers 432

CHAPTER 10

Audiology and Hearing Disorders 435

Anatomy and Physiology of Hearing 436

- The Outer Ear 436
- The Middle Ear 436
- The Inner Ear 437
- The Auditory Nervous System 438

Acoustics: Sound and Its Perception 439

- The Source of Sound 439
- Sound Waves 440

Frequency and Intensity	440
Sound Pressure Level and Hearing Level	442

The Nature and Etiology of Hearing Loss 442

Normal Hearing	442
Nature of Hearing Impairment	443
Conductive Hearing Loss	444
Sensorineural Hearing Loss	446
Mixed Hearing Loss	450
Auditory Nervous System Impairments	450

Assessment of Hearing Impairment 454

Audiometry: Basic Principles	454
Pure-Tone Audiometry	455
Speech Audiometry	455
Acoustic Immitance	455
Other Methods	456
Hearing Screening	456
Assessment of Infants and Children	457
Interpretation of Hearing Test Results	457

Management of Hearing Impairment 460

Communication Disorders of People With Hearing Impairment	461
Aural Rehabilitation: Basic Principles	462
Amplification	463
Communication Training	467

Chapter Highlights 472

Study and Review Questions 473

References and Recommended Readings 476

Study and Review Answers 478

CHAPTER 11

Assessment and Treatment: Principles of Evidence-Based Practice 479

Evidence-Based Practice in Speech–Language Pathology 479

Standard Assessment Procedures 480

Screening	480
Case History	481
Hearing Screening	483
Orofacial Examination	483
Interview	484
Speech and Language Sample	484
Obtaining Related Assessment Data	486

Principles of Standardized Assessment 487

Nature and Advantages of Standardized Assessment	487
Limitations of Standardized Tests	487
Prudent Use of Standardized Tests	488

Types of Scores in Standardized Assessment	489
Validity and Reliability of Standardized Tests	490

Rating Scales, Questionnaires, and Developmental Inventories 493

Rating Scales	493
Questionnaires	493
Developmental Inventories	493

Alternative Assessment Approaches 494

Functional Assessment	494
Client-Specific Assessment	495
Criterion-Referenced Assessment	496
Authentic Assessment	496
Dynamic Assessment	496
Portfolio Assessment	497
Comprehensive and Integrated Assessment	497

Treatment of Communication Disorders: Basic Concepts 498

Treatment: Definition	498
A Treatment Paradigm for Communication Disorders	499
Basic Treatment Terms	499
Reinforcers and Reinforcement: Basic Definitions	503

An Overview of the Treatment Process 505

Selection of Treatment Targets	505
Treatment Sequence	506
Maintenance Program	508
Follow-Up	508
Booster Treatment	509

A General Outline of a Treatment Program 509

Cultural–Linguistic Considerations in Assessment and Treatment 510

Chapter Highlights 512

Study and Review Questions 513

References and Recommended Readings 516

Study and Review Answers 518

CHAPTER 12

Research Design and Statistics: A Foundation for Clinical Science 521

Essentials of the Scientific Method 521

The Philosophy of Science: Basic Precepts	521
Validity of Measurements	523
Reliability of Measurements	524

Experimental Research 525

Foundational Concepts	525
Group Designs	526
Single-Subject Designs	528

Varieties of Descriptive Research 532

- Foundational Concepts 532
- Ethnographic Research 536
- Meta-Analysis 536

Evaluation of Research 536

- Internal Validity 537
- External Validity 539
- Levels of Evidence for Evidence-Based Practice 540

Data Organization and Analysis: Principles of Statistics 542

- Foundational Concepts 542
- Statistical Techniques for Organizing Data 543
- Types of Measurement Scales 544

Chapter Highlights 545

Study and Review Questions 546

References and Recommended Readings 550

Study and Review Answers 551

CHAPTER 13

Special Topics in Speech–Language Pathology 553

Counseling 553

- Qualities Necessary for Effective Counseling 553
- Approaches to Counseling 554
- Special Issues in Counseling 557
- Reactions and Emotions Related to Communication Disorders 558
- Defense Mechanisms 559

Medical Speech–Language Pathology 560

- Practice and Responsibilities of Speech–Language Pathologists 560
- Medical Team Specialists and Their Roles 561
- Infectious Disease Control 562
- Working With HIV and AIDS Patients 563
- Medical Imaging Techniques 565

Craniofacial Anomalies and Genetic Syndromes 566

- Craniofacial Anomalies 566
- Cleft Lip 567
- Cleft Palate 567
- Genetic Syndromes 574

Medically Fragile Infants 581

- General Facts 581
- Feeding and Oral–Motor Development 582

Chapter Highlights 584

Study and Review Questions 585

References and Recommended Readings 590

Study and Review Answers 592

CHAPTER 14

Professional Issues 595

ASHA and the Professions 595

The American Speech-Language-Hearing Association 595

The Professions of Speech–Language Pathology and Audiology 598

The Scope of Practice: Speech–Language Pathology 599

ASHA Accreditation 600

Issues in Certification and Licensure 600

Clinical Certification 601

Speech–Language Pathology Assistants 602

State Regulation of the Profession 604

Legislative Regulation of the Profession 604

Federal Legislation Affecting School Settings 605

Individuals With Disabilities Education Act (IDEA) 606

Federal Legislation Affecting Employment Settings 606

Federal Legislation Affecting Health Care Settings 607

Future Trends 608

Chapter Highlights 610

Study and Review Questions 610

References and Recommended Readings 613

Study and Review Answers 613

APPENDIX

Study and Test-Taking Tips for the Praxis 615

Nature and Purpose of the Praxis 615

Study Tips for Preparing for the Praxis 619

General Tips for Taking the Praxis 619

Understanding Computer-Generated Questions 621

Conclusion 622

References and Recommended Readings 622

Index 623

About the Authors 665
