

Introduction	7
Chapter 1: Anatomy and Physiology	9
Structures	9
Coordination of Sucking, Swallowing, and Breathing	10
Structural Differences Between Infants and Older Children	12
Nutritive vs. Non-Nutritive Suckling	13
Structural Differences in Suckling and Sucking	15
Normal Development of Feeding Skills	15
Neural Control for Swallowing	16
Reflexes and What They Mean	17
Muscles and Nerves for Eating, Drinking, and Swallowing	18
Self-Feeding and Related Gross and Fine Motor Skills	24
Normal Development of Self-Feeding Skills	25
Chapter 2: Clinical Evaluation of Infants and Children	26
Multidisciplinary Assessment of Feeding	26
Differences in Adults and Children	27
Differential Diagnosis of Feeding Disorders	27
Completing a Feeding Assessment	28
Completing a Case History	28
Feeding and Swallowing Evaluation	31
Evaluation Snapshot	50
Example Case History for Infants/Children With Feeding Problems	51
Example Feeding and Swallowing Evaluation (0-4 months)	55
Example Feeding and Swallowing Evaluation (4 months-5 years)	60
Chapter 3: Instrumentation, Devices, and Diagnostic Procedures	66
Reasons for Instrumental Studies of Swallowing	66
Purposes of Instrumental Exams	66
Fiberoptic Endoscopic Evaluation of Swallowing (FEES)	66
Modified Barium Swallow (MBS)	67
Selecting the Appropriate Study	67
Things to Do Before Performing an Instrumental Study	67
Preparing the Child for the Study	68
What the Caregiver Should Bring	68
Preparation for the Study	68
Reflux Medications	68
Positioning the Child for the MBS	68
Positioning the Child for the FEES	69
Preparing the Barium Materials	69
Radiation Dosage/Safety	70
Order of Presentation of Materials	70
Careful Monitoring of Infant's Response	71
Analysis of the Study	71

Table of Contents, *continued*

Other Procedures	71
Monitors	72
Suctioning	73
Tube Feeding	73
Chapter 4: Treatment of Motor-Based and Sensory-Based Feeding Disorders	75
Total Oral Sensorimotor Approach	75
Manipulating the Environment	75
Using the Sensory Environment to Facilitate a Child's Response	76
Response to Specific Stimuli	77
Stability, Mobility, and Tone	78
Posture and Positioning	78
Oral Sensorimotor Treatment	81
Motor Learning	82
Oral Sensorimotor Treatment Techniques	82
Specific Problems That Interfere With Feeding	83
Problems Associated With Increased Tone	84
Problems Associated With Decreased Tone	85
Problems Not Unique to Increased or Decreased Tone	87
Treatment Techniques for Problems Associated With Increased Tone	89
Treatment Techniques for Problems Associated With Decreased Tone	90
Treatment Techniques for Problems Not Unique to Increased or Decreased Tone	92
Description of Treatment Techniques	95
Changes to Food Presentation	99
Guide to Feeding Toddlers and Preschoolers	104
Chapter 5: Treatment of Experientially-Based Feeding Disorders	106
Food Refusal vs. Food Selectivity	106
Causes and Contributing Factors	107
Assessment	109
Establishing a Plan of Treatment	110
Behavioral-Based Intervention	111
Techniques to Increase Behavior	111
Techniques to Decrease Behavior	113
Skill Acquisition Techniques	115
Behavioral Feeding Disorders and Families	118
Working With Children Who Take Nothing by Mouth (NPO)	119
When an Intensive Treatment Program Is Needed	122

Chapter 6: Managing Swallowing and Feeding Disorders in the School Setting	123
<i>by Lisa Rai Mabry-Price, M.S., CCC-SLP</i>	
The Impact of IDEA '04 and Other Federal Laws	123
Demonstrating Educational Relevance	123
Competency	124
School-Based Service Delivery	124
Establishing a Dysphagia Team and Program	125
Collaborating With Medical Professionals	126
Collaborating With Families and Cultural Considerations	126
Individual Education Plans (IEPs) for Swallowing and Feeding Disorders	127
Reimbursement	128
Ethical Issues	129
Summary	129
Sample Letter	130
Parent Input – Feeding and Swallowing.....	131
Swallowing and Feeding Plan	133
Individualized Health Services Plan for Students With Special Health Care Needs	134
Chapter 7: Treatment Techniques for Infants	135
Distress Signals During Feeding	135
Assessing State of Alertness	136
Using the Sensory Environment to Facilitate an Infant’s Response	136
Developing Oral-Motor and Suck-Swallow Skills	138
Problems That Interfere With Adequate Suck	139
Problems Associated With Coordinating Sucking, Swallowing, and Breathing	142
Disorders in the Pharyngeal Stage of Swallowing	144
Nippling	145
Nutrition Tips	145
Chapter 8: Breast-Feeding the Child With a Feeding Disorder	147
Advantages and Disadvantages of Breast-Feeding	147
How Breast-Feeding Works	147
Readiness for Breast-Feeding	148
Breast-Feeding Problems	149
Suggestions for Intervention	149
Transition From Tube Feeding	152
Chapter 9: Drooling	153
Anatomy and Physiology of Drooling	153
Assessing Oral-Motor Function, Swallowing, and Drooling	154
Options for Treatment	154
Chapter 10: Goals and Treatment Objectives	157
Long-Term Goals	158
Short-Term Goals	158

Table of Contents, *continued*

Chapter 11: Tools for Feeding	168
Seating Devices	168
Breast-Feeding Supplies	169
Pacifiers	170
Nipples	170
Bottles and Bottle/Nipple Systems	171
Special Bottles for Feeding Disorders	172
Spoons	173
Cups	174
Other Feeding Tools	176
Straw Accessories	176
Tools for Oral-Motor Stimulation	177

CD Index

Case History for Infants/Children With Feeding Problems
Feeding and Swallowing Evaluation (0-4 months)
Feeding and Swallowing Evaluation (4 months-5 years)
Feeding and Swallowing Evaluation (5-18 years)
Food Preferences and Refusals
Guide to Developing a School-Based Feeding and Swallowing In-Service
Home Mealtime Diary
Information About Feeding Therapy
In-Service Guide on Dysphagia in School-Age Children
Observation of Eating at Home
Observation of Meal at School
Questionnaire for Children With Severe Drooling
Tips for Developing Good Mealtime Behaviors in Resistant Eaters
What Is a Modified Barium Swallow Study (MBS) and Why Does Your Child Need One?
